METAL RING FLUSHMOUNT 2LT
CAUTION:

- BEFORE INSTALLING FIXTURE, MAKE SURE THE POWER TO THE CIRCUIT IS TURNED OFF AT THE MAIN FUSE BOX / CIRCUIT BREAKER UTILITY BOX.

Important Safety Instructions:

- These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning the assembly and installation of this lighting fixture.
- We strongly recommend that a professional electrician install all direct wire fixtures.
- THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODES BY TWO PERSONS FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.
- The lighting fixture is meant for indoor use. It must be connected only to 3-wire, single-phase electrical supply systems (provided with Ground wire or equivalent protection system).
- For your safety, it is strongly recommended that two people install the lighting fixture.
- This fixture has been rated for up to two (2) 60-Watt maximum TYPE A standard incandescent light bulbs (not included) or two (2) 20-watt SBLED light bulbs (not included). To avoid the risk of fire, do not exceed the recommended lamp wattage.
- This lighting fixture is intended for indoor or protected/covered outdoor areas. Do not expose to direct rainfall.
  SUITABLE FOR EITHER DRY OR DAMP LOCATIONS.
- Save these instructions.

WARNING:

- To reduce the risk of fire, electrical shock or personal injury, always turn off light fixture and allow it to cool prior to replacing light bulb.
- Do not touch bulb when fixture is turned on. Do not look directly at lit bulb.
- Keep flammable materials away from lit bulb.

Pre-assembly:

- Remove all parts and hardware from box along with any plastic protective packaging.
- Do not discard any contents until after assembly is complete to avoid accidentally discarding small parts or hardware.
- For your safety, it is strongly recommended that two people install the lighting fixture.

Care Instructions:

- Dust often using a clean, soft, dry and lint-free cloth.
- Blot spills and wipe with a clean, damp cloth immediately.
- We do not recommend the use of chemical cleansers, abrasives or furniture polish on our lacquered finish.
- Hardware may loosen over time. Periodically check to make sure all connections are tight. Re-tighten if necessary.

Please read the section "To Make the Wire connections" below.
Lire la section « Pour faire les raccordements de câble » ci-dessous.
Leer la sección "Para realizar las conexiones de los cables" a continuación.
To Make the Wire Connections:

1. Gently pull the wiring from the ceiling junction box and allow wires to hang. The HOT or LIVE wire is usually black. The NEUTRAL wire is usually white. Check to see if there is a ground wire that is usually green or green with a yellow stripe or exposed copper metal wire. If needed, use a pair of wire strippers to remove about 1/2 inch of insulation from each wire.

2. Carefully inspect the fixture wires. The NEUTRAL FIXTURE WIRE is White. The HOT FIXTURE WIRE is Black. The BARE COPPER WIRE is the GROUND WIRE. If you have any doubt and cannot identify the power-supply wires with confidence, then we recommend that you ask an electrician and that you not continue with the installation.

3. With the help of another person to hold the weight of the fixture, attach the fixture wires to the junction box wires as shown in the illustrations.

   Connect the GROUND FIXTURE WIRE to the GROUND J-BOX WIRE using the Plastic Wire Nut Connector (O) and wrap the connection with electrical tape. Be sure that no wire strands are exposed.

   If the junction box DOES NOT have a GROUND WIRE, wrap the fixture's bare ground wire around the Green Ground Screw (P) and insert the screw into the Mounting Plate (A), marked as “G”, and tighten screw to secure the wire.

   Connect the NEUTRAL FIXTURE WIRE to the NEUTRAL J-BOX WIRE first and then connect the HOT FIXTURE WIRE to the HOT J-BOX WIRE using the Plastic Wire Nut Connectors (O). Wrap these connections with electrical tape. Be sure that no wire strands are exposed.

4. Check the wiring connections and if all looks good, gently tuck the wire connections neatly into the junction box.
