### Tools Required (not included)

![Phillips Head Screwdriver](image)

1.15.20  
7851.1
1. Carefully lay the Headboard (A) and Footboard (C) down on a smooth scratch free surface. Using a Phillips head screwdriver and supplied screws GA-GB, attach the legs (D-A) into bottom of headboard (A) and D_B to footboard (C), tighten with hand.

**NOTE:** Legs are attached prior to shipping.

2. Using Hex Key (J) Attach Side Rail (B) to Headboard (A) and Footboard (C) as shown, insert Hex Bolt (F) Through Lock Washer (H) and Flat Washer (E)

**NOTE:** Do not tighten up the bolts at this point to make installation of the slats easier.
3. Screw the Support Leg (L) to Middle Beam (K), and attach Middle Beam to Headboard and Footboard as shown.

4. Place the Slat(s) (I) on the bed, fix with screw (G), and then tighten with Phillips Head Screwdriver. **Fully tighten the bolts in step 2**. Assembly is complete.
